

## MHOUSE PHOTOCELLS

Pair of wall-mounted auto synchronized photocells

**Convenience:** very simple alignment thanks to the LED signal with proportional flashing. Convenient jumpers for selection of the required function

**Maximum security:** electronics protected by a second plastic enclosure to prevent damage during installation. The antidazzle circuit protects you from blinding glares generated by the sun or other powerful light sources. Up to 7 pairs of photocells can be installed without worrying about their proximity  
**Sturdiness:** extra thick polycarbonate body
